Betty J. Goldentyer, D.V.M.
Deputy Administrator
USDA-APHIS-Animal Care

Via e-mail: Betty.J.Goldentyer@usda.gov; ac.complaints@usda.gov

Dear Dr. Goldentyer:

Thank you in advance for your time. I'm writing on behalf of People for the Ethical Treatment of Animals (PETA) to request that the U.S. Department of Agriculture's (USDA) Animal and Plant Health Inspection Service (APHIS) investigate another occasion in which a registered research facility, a licensed dealer, an accredited veterinarian, and a registered carrier failed to abide by federal Animal Welfare Act (AWA) regulations established to ensure the safe and legal movement of primates throughout the U.S.

PETA's latest documentation shows that Worldwide Primates, Charles River Laboratories, and JKL Secure Freight continue to violate Animal Welfare Regulations (AWR).

Through the Freedom of Information Act, PETA has received certificates of veterinary inspection (CVI) from multiple state agencies documenting the veterinary inspection required for the inter- and intra-state transport of primates among facilities. The attached CVI shows that Worldwide Primates (58-B-0542), Charles River Laboratories (14-R-0144 and 14-B-0013), and L R Transport LLC (dba "JKL Secure Freight," 88-T-0010) failed to comply with the AWRs noted below. **This multiday, roughly 3,000-mile drive posed a risk to all 167 long-tailed macaques in transit as well as the monkeys already at Charles River and the public at large.**

CVIs serve as records of the movements of primates throughout the U.S. Veterinary inspection of primates within 10 days of transport from facility to facility, as required by the CVI, is a critical step in maintaining the public health safety net that must be in place when moving species who have a demonstrated capacity for transmitting zoonotic diseases.

Primate quarantine is failing to prevent the introduction and spread of dangerous pathogens into and throughout the U.S., and animals are moving between facilities carrying pathogens that represent significant public health risks. A [case report](#) just published by individuals working at the Centers for Disease Control and Prevention (CDC), the Texas Department of State Health Services, and monkey importer Inotiv's primate quarantine facility in Texas revealed that during 2022, at least four monkeys imported from Cambodia into Texas had been released from quarantine despite being infected with and likely shedding *Burkholderia pseudomallei*. This deadly pathogen is classified as a bioterrorism agent.

Additionally, CDC documents obtained by PETA through the Freedom of Information Act show that primates arriving in the U.S. between 2019 and 2021 were infected with *Yersinia pseudotuberculosis*, *Yersinia enterocolitica*, Shigella, Campylobacter, tuberculosis, simian retrovirus, and herpes B virus as well as undetermined pathogens that caused hemorrhagic gastroenteritis (bloody diarrhea) and erosive colitis with serositis (diarrhea so profound that the lining of the gut is shed).

Worldwide Primates also imports long-tailed macaques from Cambodia, where *Burkholderia pseudomallei* is endemic. Evidence in the U.S. Department of Justice's (DOJ) recent [indictments](#) of Cambodian government officials and nationals who allegedly conspired to import long-tailed macaques into the U.S. from Cambodia illegally implicates that Worldwide Primates has received some of the allegedly trafficked monkeys. The health histories of these wild-caught monkeys are even more obscure and complicated than those of captive-bred primates.

Apparent Violations of AWRs

As you know, CVIs are signed by USDA-accredited and state-licensed veterinarians. They are legal, regulatory documents required by law to be completed no more than 10 days prior to the delivery of primates. Carriers may only accept primates for transportation if the animals are accompanied by a valid CVI.

- **9 CFR § 2.78(a)(1):** “No dealer ... shall deliver to any intermediate handler or carrier for transportation, in commerce, or shall transport in commerce ... any ... nonhuman primate unless the ... nonhuman primate is accompanied by a health certificate executed and issued by a licensed veterinarian [stating that] the licensed veterinarian inspected the ... nonhuman primate on a specified date which shall not be more than 10 days prior to the delivery of the ... nonhuman primate for transportation.”
- **9 CFR § 2.78(a)(2)(c):** “No intermediate handler or carrier to whom any live ... nonhuman primate is delivered for transportation by any dealer, research facility, exhibitor, broker, operator of an auction sale, or department, agency, or instrumentality of the United States or any State or local government shall receive a live ... nonhuman primate for transportation, in commerce, unless and until [the animal] is accompanied by a health certificate issued by a licensed veterinarian in accordance with [9 CFR § 2.78(a)].”
- **9 CFR § 2.38(h)(1)(i):** “No research facility, including a Federal research facility, shall deliver to any intermediate handler or carrier for transportation, in commerce, or shall transport in commerce any ... nonhuman primate unless the ... nonhuman primate is accompanied by a health certificate executed and issued by a licensed veterinarian. The health certificate shall state that ... the licensed veterinarian inspected the ... nonhuman primate on a specified date which shall not be more than 10 days prior to the delivery of the ... nonhuman primate for transportation.”

Repeat Offenses

This most recent complaint follows our April 2022 one to APHIS that documented a 17-month period over which we identified 56 apparent violations of the AWRs, involving more than 1,881 primates from five research facilities or dealers across sites in five states. These animals were shipped to nine research facilities or intermediate handlers in 10 states. So far, APHIS has cited Charles River Laboratories (on July 25) for a shipment from Charles River Reno to the

University of Utah and JKL Secure Freight (on June 1) for 14 separate shipments. Charles River and JKL now warrant repeat citations.

Resulting Health Risks to Monkeys and Humans

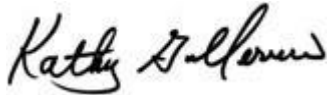

Inappropriate veterinary inspections and the failure to comply with 9 CFR § 2.38(h)(1)(i), 9 CFR § 2.78(a)(1), and § 2.78(c)(2) increase the public health risk for staff transporting the monkeys, staff at the receiving institutions, and potentially the public at large. The failure of USDA-certified veterinarians to conduct timely inspections of the primates before and/or after movement across state lines poses enormous risks to the monkeys in transport, who may not be well enough to survive the stressful trips, as well as to the monkeys at the destination facility, who risk exposure to pathogens that the newly arrived animals may be shedding.

Request: Immediate Investigation

The public expects that USDA-accredited veterinarians, primate facilities, and transporters will comply with federal regulations designed to safeguard animal welfare and protect public health. In order to uphold your mission to the American public, we urge you to initiate an immediate investigation into these violations. Where appropriate, we ask that you suspend or revoke licenses or accreditations and/or pursue civil and/or criminal penalties through the USDA Office of the General Counsel and/or the DOJ.

Thank you for your time and consideration.

Sincerely,

Kathy Guillermo
Senior Vice President

Lisa Jones-Engel, Ph.D.
Senior Science Advisor, Primate Experimentation
