Type: ROUTINE INSPECTION

MADISON, WI 53726

Date: Apr-09-2009

3.80 (a) (2) (iii)

PRIMARY ENCLOSURES.

(a) General requirements.

.....(2) Primary enclosures must be constructed and maintained so that they:.....

.....(iii) Contain the nonhuman primates securely and prevent accidental opening of the enclosure, including opening by the animal;.....

**While reviewing records it was noted that non human primate RQ2653 was found on the morning of 6/29/2007 to have escaped from its enclosure and was loose in the animal room. Interactions between RQ2653 and two other caged animals resulted in the hand injuries of #R97097 (laceration to the right palm) and #00E106 (right index finger). It is the responsibility of the facility to ensure that the enclosures securely contain the non-human primates in order to promote the health and well-being of the animals as set forth in this section.

**Records and interviews indicated that corrective procedures have been established to prevent animals from escaping. Personnel have been retrained in the proper handling and care of the animals housed in the facility.

Correction: Ensure established procedures are properly followed.

This inspection was focused on nonhuman primates at the Medical School.

Inspection was conducted with the Associate Director, RARC, Chief Campus Veterinarian and other staff members.
