Hi [REDACTED] reproductive,

I do not want to participate in the live porcine portion.

Best,

[REDACTED]

Hi, team-

As you all know we have our annual day-long surgical skills simulation days coming up. These days are made up of a mixture of cadaveric dissection and laparoscopic skills using live porcine models. This is always such an incredible learning experience for the residents and I fully encourage you to participate in the lab as you are able. I know that some of you may have objections to operating on live pigs and I want you to know that is OK. If you could please send me an email to let me know, that would be great. We will likely still have you participate in the fresh frozen cadaver portion of the lab and then have you spend time doing FLS practice. You can call or text me, or speak with Meg who runs the sim, if you need to discuss this further.
