Ethiopian Airlines

Type: ROUTINE INSPECTION
Date: 16-JUL-2023

3.86(c)

Consignments to carriers and intermediate handlers.

On July 16, 2023, Ethiopian Airlines (Flight ET518) AWB 645-00126534 transported 336 non-human primates from Mauritius to ATL without specific feeding and watering instructions attached to the outside of the primary enclosure for the next 24 hours of travel. Instead, the instructions stated to "top off with bottled water at transit and feed..." without specifying the times of those offerings which was not detailed enough. The only time noted on the instructions was the last time they were provided food and water prior to transport. Instructions for future food and water provisions must be included for the next 24 hours so that all parties who take possession of the animals will be able to provide for their health, well-being, and comfort in cases of adverse events such as unforeseen delays during transport. All future non-human primate shipments must include the required food and water certifications with 24-hour food and water instructions as well as the consignor's signature with the date and time it was signed.

This inspection and exit interview were conducted with facility representatives.
